NATIONAL NETWORK
TO END DOMESTIC
VIOLENCE

Dear Advocate,

Now is the time for your voice to be heard!

This month, the U.S. Senate and House of Representatives plan to repeal the Affordable Care Act (ACA). A repeal would threaten the healthcare of countless women across our country but victims of domestic violence would face particularly harm. Let's ensure that our Congressional Representatives and Senators know that this is simply inexcusable.

Call on your Representatives and Senators today to prioritize the health of victims across the country.

If the ACA is repealed, insurance companies will be able to charge victims of domestic violence more simply because they have experienced abuse. The ACA also provides autonomy to victims of domestic violence, enabling them to have insurance options beyond their abusive spouse's insurance plan. Additionally, the ACA has helped promote screening of domestic violence by health professionals, helping survivors access early help and support.

Contact your Congressional delegation to urge them to fight the repeal of the ACA.

Please click to email and ask your Members of Congress to defend the Affordable Care Act today or call them directly.

Calls are vital on this important issue. Capitol switchboard: 202-224-3121. To contact your Representatives and Senators directly:

Senate: <https://www.senate.gov/senators/contact/>. House: <http://www.house.gov/representatives/find/>.

Again, thank you for standing with survivors each and every time we have called upon you to act. Your voices matter. Survivors are safer because of you.

For peace and safety,

Kim Gandy, President & CEO, NNEDV
