

## A Current up to date Release of Information concerning Stop the Silence™

Date: May 6, 2012

Topic: Stop the Silence joins CauseACTION to **stop child sexual abuse on line and on Facebook.**

### Summation:

Stop the Silence: Stop Child Sexual Abuse, Inc. (Stop the Silence, <http://stopcsa.org>) joins CauseACTION (<http://CauseACTION.com>) in spreading the word to **stop child sexual abuse on line and on Facebook.** CauseACTION's Campaign will be the subject of a major web expose to be published on May 7th, 2012 and the website can be seen at [www.stopchildpornonfacebook.com](http://www.stopchildpornonfacebook.com)

It starts with a photograph. The young girl, perhaps six or seven years old, is not smiling in the picture. With her head turned slightly to the right, she looks coyly at the lens. Her hair is done in a highly stylized arrangement with green and yellow ribbons. Along with other makeup, she is wearing lipstick, eyeliner and shadow. She is standing outside, a blue sky and unidentified foothills behind her. **She is holding an inflatable Daffy Duck. She is completely naked.**

After a 10-month investigation in which CauseACTION (<http://CauseACTION.com>) created their own Facebook avatar in order to infiltrate the world of pedophiles and child-abusers using Facebook, they uncovered an enormous, thriving online community of human trafficking, prostitution, child pornography, and other forms of commercial sexual exploitation on Facebook (see <http://stopchildpornonfacebook.com/>).

The truth is that most of the 600 million users of **Facebook** probably consider Facebook to be well-patrolled and safe from such content. The vast majority of Facebook users, from parents to major corporations, NGO's, politicians and even the President of the United States, have no idea that Facebook is **home to a massive collection of unreported child pornography and sexual violence.**

**So, the question is this:** If Facebook has the human and technological resources to topple governments and shift human history shouldn't it be able to prevent sexually explicit and abusive images of children — some only newborns from being placed on their system?
